

# Digital Mesh Portfolio

Originally, mesh just hid the underbelly of bleacher seats, scaffolding, and fencing. Now — especially in today’s world of social media imaging and branding in every corner of everywhere — mesh not only continues to hide what’s behind the scenes, it also serves as a place to showcase your brand and present a “finished” look on everything.

The mesh options we have available for you are infinite. We can match a color or use colors we have in stock. We can add images, logos, messaging — anything you want — so you can communicate to the crowds from afar or even set the stage for a backdrop that people will want to use when they are posting to social media.
